Dear Alex,

Sorry for the very long wait for our comments.

We like your article, and it is exactly the sort of thing we are looking for. We only have minor changes to recommend. We propose to use your article to launch the column in the next issue.

We like the mixture of historical context and summary of key themes. We suggest that you expand a few of the acronyms to improve readability.

"Since speech technology is traditionally quite resource intensive, and such resources are typically scarce in the developing world, these groups have developed a number of innovative approaches for problems such as the creation of pronunciation dictionaries and usable speech corpora." Would it be possible to give an idea of what the innovative approaches are?

You can take a little more space to address these comments, but please do not allow the article to expand too much.

Let me know if you need any assistance preparing the final version of your column, and thanks for your submission.

Maria

Dear Alexander and Thomas,

Thank you very much for submitting your column on AI in South Africa to the forthcoming AI Magazine feature "Worldwide AI" edited by Maria Fox, Eric Horvitz, and Manuela Veloso. I'm delighted to officially accept your column for AI Magazine!

From this point on, AAAI will be handling the production process directly. You'll be receiving a followup message from AAAI about details of the production process and the submission of the final version, copyright form, etc.

Thank you again for all your work on this. I know that your report will be of great interest to readers, and I'm looking forward to having it appear in the magazine!

Best wishes,
David
